

Optolite Indicators

INDICATOR LIGHTS

This section of the catalog has been compiled to provide the necessary specification information as concisely as possible. In particular, the Indicator Selection Guide, found on pages two and three, serves as an effective tool. General availability is summarized in the table below.

Complete assembly part numbers are tabulated for each indicator/cap combination. Very simple substitutions in these numbers allow changes in color and substitution of translucent for transparent lenses. The desired lamp number is simply added as a suffix to the part number.

Our panel indicators embody the best materials and performance features. Materials, finishes, and workmanship conform to military, federal, or industry specifications. A cross reference listing of Electroswitch indicators which are on the MIL-L-3661 Qualified Products List and also those which may be ordered against MS (Military Standard) designations is shown on page 35.

Because of the wide variety of items in the Electroswitch Optolite Indicator line, it is possible to select a standard (off-the-shelf) unit to meet a precise requirement. Variations can also be furnished, such as caps in special colors or hot stamping and engraving.

The Electroswitch sales staff is always at your service whenever additional information or assistance is required.

Indicator Availability Summary	Sub-Miniature	Miniature	Miniature, Neon	Standard
General Purpose	F	B	R	--
